# Management Board letter to shareholders

#### **DEAR SHAREHOLDERS. DEAR BUSINESS PARTNERS.**

JDC Group AG boosted its growth and profits significantly in the first half of 2021, exceeding the Management Board's positive growth forecast for the year as a whole.

Consolidated revenues grew by around 17 percent to EUR 68.6 million in the first half of 2021, while there was also a significant improvement in profits, with the Advisortech and Advisory divisions again both contributing to the growth in revenues and profits.

#### Important steps during the second quarter of 2021

The JDC affiliates reported major successes in the second quarter:

#### Joint venture between Provinzial and JDC

In June, JDC Group AG and an affiliate of Provinzial Holding AG signed an agreement to set up a joint venture by the name of Einfach Gut Versichert GmbH, formalising the letter of intent signed in February. This collaboration agreement will enable JDC to make the exclusive third-party insurance platform available for around 100 savings banks in Provinzial's business region in the coming years, expanding its current business volume considerably as a result.

#### JDC Group subsidiary acquires all the shares of MORGEN & MORGEN GmbH

The acquisition of MORGEN & MORGEN GmbH just a few weeks ago expands JDC's own platform in the areas of data analysis, software development and product knowledge with an analysis of the prices of all insurance products marketed in Germany. Prices can now be compared and rated across all data dimensions, and products can be recommended and sold with the aid of algorithms and artificial intelligence.

However, the data and analytics expertise is aimed not only at customers and intermediaries, but especially at insurance companies, which can benchmark their products against the competition with the aid of the MORGEN & MORGEN data and target their product policy effectively. Producers regularly use data and calculations from MORGEN & MORGEN for internal insurance comparisons and analysis, ratings and rankings. With Volatium, the company has also developed a single standard for full transparency and comparability of return probabilities for all German pension products. MORGEN & MORGEN's company and product ratings are among the highest in the German market.

The acquisition of MORGEN & MORGEN GmbH makes the JDC platform even more attractive for its intermediaries and customers.

#### TME study declares JDC Group the winning digital financial platform provider

As a result of the sustained platform investments in the past few years, JDC Group AG emerged as the winner in an extensive market study by management consultancy firm TME on providers of financial platforms, which was published in 21/04/2021. The study, which entailed an in-depth analysis and comparison of all JDC Group AG's competitors, found that JDC's platform functionalities are sophisticated and particularly strong on customer support and data processing. They open up the business of insurance for all market participants. This enables banks to work with the systems as brokers, multi-tied agents and exclusive agents. The study also found that JDC's retail customer front end, based on the web app 'allesmeins', is a reliable aid for consumers' own management of insurance contracts. Here, JDC also offers a wide range of products, from white label solutions to API communication through the platform.

#### Results for the first six months and the second guarter of 2021

#### THE PERFORMANCE OF THE INDIVIDUAL SEGMENTS WAS AS FOLLOWS:

#### Advisortech

The revenues generated by the Advisortech segment grew by around 14.0 percent in the first six months of 2021, to EUR 56.4 million (first six months of 2020: EUR 49.6 million). Second-quarter revenues were up around 15 percent year on year, at EUR 25.8 million, compared with EUR 22.4 million in the same quarter of 2020.

Earnings before interest, tax, depreciation and amortisation (EBITDA) in the first six months of 2021 were up again on the same period of the previous year, at EUR 4.5 million compared with EUR 3.7 million, a year-on-year increase by 20.7 percent. EBITDA rose to EUR 1.5 million in the second quarter of 2021 (first six months of 2020: EUR 1.2 million).

Earnings before interest and tax (EBIT) increased to EUR 2.7 million in the first six months of 2021 (first six months of 2020: EUR 2.0 million). EBIT thus improved by as much as 36.2 percent. EBIT rose to EUR 0.6 million after EUR 0.4 million in the same period of the previous year.

Excluding the non-recurring project costs for the acquisition of MORGEN & MORGEN and the establishment of the joint venture with Provinzial, the earnings (EBITDA and EBIT) for the second quarter – and therefore also the first half of the year – would have been around EUR 0.2 million higher.

#### Advisory

In the Advisory segment, revenues in the first six months of 2021 grew significantly by around 24 percent year-on-year to EUR 17.3 million (first six months of 2020: EUR 14.0 million). For 2021 we now expect revenues to grow to between EUR 140 million and 145 million (as compared with the previous estimate of between EUR 135 million and EUR 142 million) and EBITDA in excess of EUR 8 million.

#### **Research and Development**

In the Advisortech segment, we offer advanced advisory and administration technologies for our customers and advisers through the Jung, DMS & Cie. Group. JDC Group develops its own software solutions for this purpose. In the first six months of 2021, the value of work generated for our own purposes and capitalised was kEUR 578. For further details, please see the notes to the consolidated financial statements.

#### **ECONOMIC REPORT**

#### **Overall Economic Conditions**

The German economy started the year 2021 on a negative note. According to the calculations of the Federal Statistical Office of Germany, the gross domestic product (GDP) for the first quarter of 2021 was down 2.1 percent in comparison with the preceding fourth quarter of 2020. The second quarter of 2021 saw an increase of 1.5 percent in gross domestic product (GDP) in comparison with the previous three months of the year. This recovery was primarily driven by consumer spending and government consumption expenditure. In a recent statement by the International Monetary Fund (IMF), the global economic growth forecast for industrial countries was revised upwards. By contrast, the forecast for poorer countries was lowered. Access to vaccines is seen as critical for a faster recovery.

#### The Market and Competitive Position

#### THE MARKET FOR INVESTMENT PRODUCTS 1)

The German investment funds industry saw net inflows of around EUR 60 billion in the first three months of 2021 – the best first quarter in six years. A significant inflow of EUR 31.2 billion was recorded in specialised institutional investment funds, while EUR 29.4 billion was newly invested in retail funds.

Members of the German Investment Funds Association (BVI) were managing EUR 1.28 trillion in retail funds at the end of the quarter. Open-ended specialised institutional funds contributed EUR 2.0 trillion to the total assets under management.

The investment funds industry as a whole was managing assets totalling EUR 3.95 trillion for investors at the end of March 2021. This represents an increase of 2.5 percent compared with the end of December 2020.

#### THE INSURANCE MARKET<sup>2)</sup>

Premium income in the insurance industry was up slightly in 2020 compared with the previous year. The increase was caused by growth in private health insurance, non-life insurance and life insurance. The upward trend is expected to continue at around 2 percent for the remainder of 2021 if conditions remain constant. According to the German Insurance Association (GDV), developments will be influenced by pent-up demand, some of which could fuel an increase in occupational pensions.

In private health insurance, premium income is currently rising slightly. Growth in premiums is expected to be slightly weaker in property and casualty insurance. In life insurance, premium income is on the rise again.

#### OUTLOOK

In 2021, the market for financial services will again be marked by continued uncertainty, volatility, low interest rates and higher inflation. The interest losses caused by low interest rates – particularly in the insurance business – will mean a further reduction in the net interest return on insurance products. Sales of investment and life insurance products should increase further in comparison with 2020 if the general conditions remain stable.

#### **Competitive Position**

JDC Group AG competes with different companies in its individual business segments.

#### COMPETITORS IN THE ADVISORTECH SEGMENT

In the Advisortech segment, the JDC Group offers retail customers an intermediary service in relation to financial products such as investment funds, alternative investment funds, structured products, insurance and credit products via independent financial intermediaries (B2B2C) through its subsidiaries (JDC).

<sup>&</sup>lt;sup>1)</sup> Unless otherwise indicated, all data in the following description of the market for investment products is from the investment statistics for the first quarter of 2021 provided by the German Investment Funds Association BVI (20 May 2021).

<sup>&</sup>lt;sup>2)</sup> All data in the following description of the market for insurance products was taken from the industry data on the website of the German Insurers' Association (GDV) at gdv.de.

As a technical platform, JDC is in competition with all companies that use independent intermediaries to sell the above financial products to other intermediaries or retail customers. These include broker networks and broker pools such as Fonds Finanz Maklerservice GmbH and BCA AG, in addition to commercial banks, savings banks, cooperative banks and financial services distribution companies that target retail customers.

Also in the Advisortech segment, JDC offers white-label front-end services, which enable customers (banks, insurance companies, IFAs and retail customers) to view contract data via apps, online tools and web applications. JDC's competitors in this business include Clark and getsafe.

In the third subsegment, we offer advisory services for retail customers and a comparison platform for financial products. In this business, JDC is in competition with Verivox and Smava.

#### Competitors in the Advisory Segment

In the Advisory segment, JDC Group AG provides retail customers with advice and intermediary services in relation to financial products through its subsidiaries FiNUM. Private Finance Germany, FiNUM. Finanzhaus and FiNUM. Private Finance Austria (B2C). In principle, all the companies are in competition with a large number of market participants. Apart from financial services distribution companies and individual brokers, they are also in competition with tied agents of insurance companies and banks, along with companies that use direct distribution channels including the internet. Based on the different business models and target groups, JDC Group sees the following as the companies' main competitors:

FiNUM.Private Finance Germany, FiNUM.Finanzhaus and FiNUM.Private Finance Austria focus on providing advisory services to discerning retail customers (the mass affluent market) in Germany and Austria. The business mix consists in more or less equal parts of wealth accumulation and preservation (insurance business). The main competitors in this business are therefore commercial banks, private banks and large financial services distribution companies – such as MLP AG and Horbach Wirtschaftsberatung AG.

#### **BUSINESS PERFORMANCE OF THE GROUP AND ITS SEGMENTS**

Owing to its high volume of business, its reliability and its increasing significance in the market, JDC Group AG is increasingly attractive as a partner to product initiators in both the insurance and the investment sectors. JDC Group AG is also attractive to financial services distribution companies or financial intermediaries seeking a strong institutional partner to which they can outsource their back-office functions in the rapidly changing regulatory environment.

Overall, the Management Board considers the business performance to have been positive.

This positive development is the result of an increase in revenues and profits in the Advisortech and Advisory segments. Combined with the investment business, which has picked up during the coronavirus crisis, the key account business is generating a significant increase in revenues. However, the coronavirus pandemic has also led to higher staff and office expenses to enable business operations to continue with minimal impact. This has had only a slight negative effect on profits, in which there is a clear upward trend overall. In the second half of the year we will announce further major projects, which will result in higher profits if costs remain constant.

The Group's non-current assets as at 30 June 2021 amounted to EUR 62.1 million (previous year: EUR 59.5 million), of which around EUR 51.4 million comprised intangible assets (previous year: EUR 47.9 million). The increase is mainly due to the acquisition of another company, which was capitalised as a customer list as part of the initial consolidation.

Current assets remained steady at EUR 32.6 million (previous year: EUR 32.3 million). Since the beginning of the year, cash at banks have increased by EUR 2.8 million to EUR 14.6 million.

Total assets increased from EUR 91.8 million in 2020 to EUR 94.7 million in 2021. This was mainly caused by an increase in intangible assets by around EUR 3.5 million in comparison with 31 December 2020.

At EUR 39.7 million (previous year: EUR 38.7 million), non-current liabilities were up by EUR 0.5 million in total, mainly due to the increase in deferred tax liabilities caused by the recognition of lease liabilities in accordance with IFRS 16.

There was a slight increase in short-term liabilities to EUR 26.7 million, compared with EUR 25.8 million in 2020. This figure includes EUR 17.4 million in accounts payable and EUR 7.6 million in other liabilities.

The equity ratio of the JDC Group as at 30 June 2021 was 29.9 percent of the total assets (31 December 2020: 29.7 percent). The Group therefore has a very good equity base.

#### **OPPORTUNITY AND RISK REPORT**

The Group's future business performance involves all the opportunities and risks associated with the distribution of financial products and the acquisition, management and disposal of companies. The risk management system of JDC Group AG is aimed at identifying risks early and minimising them by taking appropriate measures. Financial instruments are used only for hedging purposes. In order to identify early any potential problems in the affiliated companies and the companies in which they in turn hold equity investments, key indicators are monitored and evaluated. Monthly, weekly and daily analyses of turnover, revenues and the liquidity position are prepared. Management obtains a daily summary of the turnover and liquidity ratios.

JDC Group AG is controlled by means of a monthly reporting system, which includes the key indicators and pays particular attention to the liquidity position. On top of this, the Management Board is updated on the current level of liquidity on a daily basis.

#### Relevant company-related risks are as follows:

- In the context of providing intermediary services relating to financial products and insurance products, it cannot be ruled out that cancellations could give rise to expenses not balanced by claims for refunds of the same amount from intermediaries. With the increase in JDC's insurance revenues, receivables management to collect such refunds is of greater importance than before.
- Claims could be made against JDC for misinformation or misadvice by distribution partners. It is not
  possible to make a blanket statement as to whether the risks in specific cases will be covered by
  existing insurance policies or by the refund claims against intermediaries.
- The continuing volatility of the capital markets and the difficulty in forecasting the product turnover means great demands have to be placed on the liquidity management system. A lack of liquidity could become an existential problem.
- JDC is increasingly a focus of attention on the capital market. Its customers also include growing numbers of big corporations. Any damage to its image could lead to a loss of revenues.

#### Relevant market-related risks are as follows:

- The business success of the company is fundamentally dependent on economic developments.
- Developments on the German and global financial and capital markets are of considerable importance to JDC's success. Continuing volatility or adverse developments could have a negative impact on JDC's profitability.
- The stability of the legal and regulatory environment in Germany and Austria is of great importance.
   Short-term changes in the environment for financial services companies, intermediaries and financial products, in particular, could have adverse impact on JDC's business model.

#### Relevant regulatory risks are as follows:

- The implementation of the European Union's General Data Protection Regulation (GDPR) affects all German companies, but particularly those in the financial services sector, whose business involves working with personal data to a particularly large extent. The GDPR imposes extensive information and documentation obligations on us. As the digital transformation of the insurance industry is just beginning, many processes at JDC still have to be handled manually. This increases the risk of data breaches due to human error.
- Since the implementation of MiFID II in German law, portfolio commissions are only paid if they are used to improve the quality of customer advice. Much of the structure remains unclear. If the measures taken at JDC are not sufficient, there could be a temporary loss of revenues in the investment business.

Management cannot discern any other risks to the company's existence or growth, and is of the opinion that the risks identified are manageable and do not constitute a threat to the company's continued existence.

Management views the **opportunities** as follows: Many financial services distribution companies are currently weakened financially by the Covid-19 crisis in particular. As a result, the financial resources of many of our competitors have been exhausted and the pressure to consolidate is increasing. Large market participants, including the JDC Group companies, will benefit from this.

JDC Group took some decisive measures in 2021 to set the course for the coming years. 2021 marked the beginning of JDC's collaboration with Sparkasse Bremen, one of the largest German savings banks. The start-up company Finanzguru is another bancassurance customer using JDC's platform technology. Jung, DMS & Cie. and the Provinzial group are planning a joint venture to support more than a million retail customers of the savings banks. Jung, DMS & Cie. also acquired all the shares of MORGEN & MORGEN GmbH.

In the view of the Management Board, this will all result in the continued overall positive performance of JCD Group AG's equity investments, and thus also of JDC Group AG itself, in the financial year 2021.

#### **OUTLOOK**

#### **Economic outlook**

IMF projects global economic growth of 5.5 percent in 2021. This is based on global access to vaccines and further economic stimulus packages for individual countries.

How long the pandemic continues, and the policies used to deal with it, will determine how quickly the economy can recover. If this phase continues for a long time, therefore, it is very likely that the global economy will not show signs of a recovery until 2022.

#### Market and sector outlook

It is likely that there will continue to be plenty of liquidity in the market and that this will buoy up the equity and property markets. Due to the level of government debt around the world, which can only be financed by a global increase in the money supply, the inflation likely to result will make tangible assets more attractive than financial assets. That is positive for JDC Group's business.

However, the Covid-19 crisis also poses great risks. The economy is presently still in a recession which, owing to falling company profits, may put the capital market under pressure for a long time. Companies will put investments on hold and consumers will suffer income losses and cut down on spending. Interest rates are also rising again on the bond market, with stock market turbulence as a consequence. It is not possible to predict when the recession will be over, despite the availability of vaccines.

#### Outlook for the JDC Group consolidated group

#### **EXPECTED BUSINESS PERFORMANCE**

The expectations regarding the business performance of the JDC Group in 2021 are based on the economic assumptions outlined in the Group management report. The ongoing Covid-19 crisis, and the possibility of a resulting recession, with companies putting investments on hold and consumers suffering a loss of income, may have an impact on the financial, assets and income position of the JDC Group. The company plan was developed on the basis of very detailed studies and assumptions that JDC Group AG believes are realistic.

JDC Group's main priority in 2021 will be to achieve a significant, sustained improvement in its operating activities. In 2021 the Group will focus on

- growth, and thus also scaling of the platform;
- optimisation of internal processes and cost management.

We confirm our positive assessment for the remainder of 2021, and are raising the guidance previously published. Based on collaboration agreements already signed, the company now expects revenues to grow to between EUR 140 million and EUR 145 million over 2021 as a whole (compared with the previous guidance of EUR 135 million to EUR 142 million), with EBITDA in excess of EUR 8 million (previously in excess of EUR 7 million).

#### 2.2.3 Impairment losses

The goodwill was tested for impairment as at 31 December 2020. The recoverable value of the Advisor-tech and Advisory cash-generating units is determined by calculating a value in use from forecasts for the cash flow before income tax. These forecasts were made on the basis of detailed budget projections for the group companies for the financial year 2021 approved by Management and the Supervisory Board. For the financial years 2022 to 2023, moderate growth rates (Phase I) are assumed. For subsequent periods, the cash flow was forecast as a perpetuity (Phase II). Given a risk-free base rate of -0.31 percent (2020: -0.35 percent) derived from the yield curve, a market risk premium of 5.81 percent (previous year: 5.85 percent), and applying a beta factor for the comparative investment of 0.88 (previous year: 1.11), the capitalisation rate is 5.5 percent (previous year: 6.0 percent). The capitalisation rate used to determine the present value of the initial cash flows of the perpetuity includes a deduction for growth of 1.0 percent (previous year: 1.0 percent). An additional major factor influencing the free cash flow is the assumptions with regard to growth in revenue and growth in the profits of the operating units.

The increase in the discount rate before taxes to 7.5 percent (up 2 percent) would mean no impairment was necessary for the cash-generating units. The 20 percent decline in the planned EBIT figures in the cash-generating units would not result in any impairment. A significant additional reduction in the planned EBT growth could lead to the carrying amount exceeding the recoverable amount. However, the Management Board believes such a scenario is unlikely, as significant measures to increase the EBT have already been introduced.
